

Hydrogen Coolers

Enerfin Hydrogen Coolers (RHY) are designed and manufactured to precise tolerances, insuring a product that will match your Generator mating flange for a perfect “drop-in” fit.

Enerfin Hydrogen Coolers (RHY) are designed and manufactured around our extruded aluminum fin tubing, giving you years of continuous reliable performance.

Applications

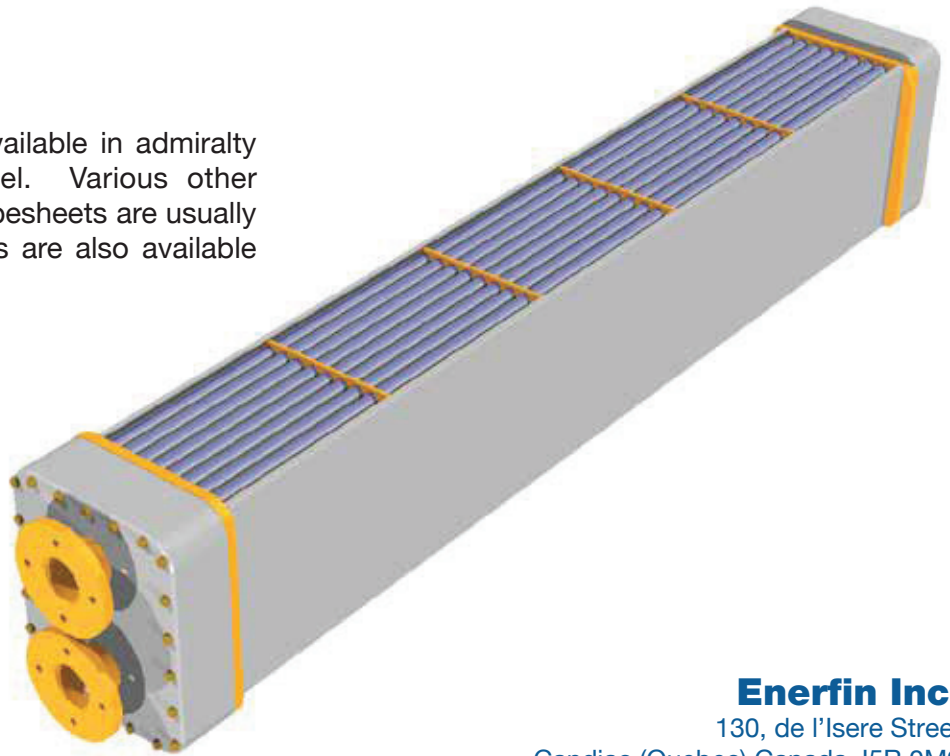

- Turbo generators;
- Synchronous condensers.

Features

- Enerfin also offers complete re-conditioning of old coolers and reverse engineering where drawings are not available. Drain pans are available upon demand.
- Leak detector can also be offered depending on required performance and available cooler space.

Material

- Liner tubes for the (RHY) coolers are available in admiralty brass, cupro-nickel, and stainless steel. Various other materials are available upon request. Tubesheets are usually in rolled naval brass, but other materials are also available upon request.
